- Agenda : Plan for 2017-18
- Strategy for the smooth execution of club activities
 - to limit activities
 - Enhance teaching methodology

The Chairperson called for the meeting in order to find ways to improve on the overall academic and extra-curricular activities.

The chairperson started the meeting by expressing her concern for the need to upgrade the teaching pattern. She very categorically stated that the faculty members of the college have been taking steps to enhance teaching methodology year after year. However, efforts for the same should not stop. So, it was decided that each faculty member use two different techniques in his/her subject. This idea was agreed by all.

The next point in discussion was the extra-curricular activities. It was expressed by one of the faculty members that the college conducts a variety of well-chosen and well formulated activities. However, due to the paucity of time sometimes all the planned activities cannot be conducted. Moreover, student's participation was decreasing, as the activities were conducted during the last two lectures.

It was decided to conduct activities on Saturdays after two lectures. So, students and faculty both would be free to participate and to conduct it well.

This suggestion was seconded by all especially the student representatives. So, it was decided first to limit the number of activities conducted by each club and to conduct all club activities on Saturdays only.

Thus, the meeting ended.
